

The Upper Neuse River Basin Association: *Re-Examining the Falls Lake Stage II Goals, Monitoring*

City Council Work Session

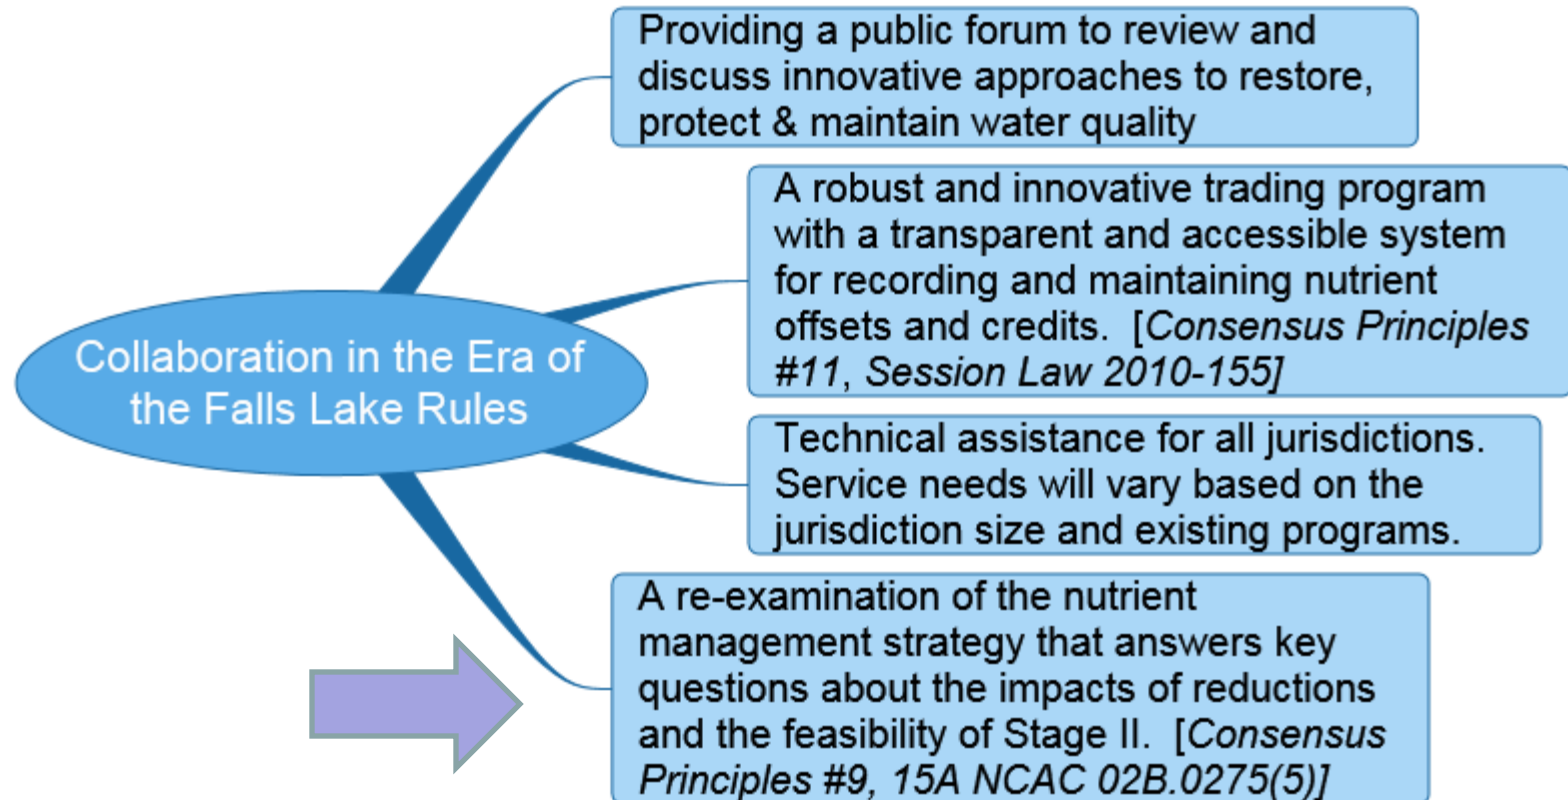

March 7, 2013

Paul Wiebke, Michelle Woolfolk

The Upper Neuse River Basin Association

Falls Lake Association Goals Reflected in the Path Forward

Steps to a Re-examination of Falls Lake (Stage II)

Step 1. Determine what monitoring and advanced technical analyses are needed to re-examine the nutrient management strategy.

Step 2. Execute the field monitoring effort and perform needed technical analyses to support the re-examination.

Step 3. Evaluate current, and potential future, regulatory programs to manage upper and lower Falls Lake for recreational, fishing, drinking water, and other uses.

Re-examination is expensive, but
Durham needs it to change Stage II
